Dr. Joshua Lederberg
Department of Genetics
Stanford University School of Medicine
Palo Alto, California 94304

Dear Dr. Lederberg:

WKAR is currently preparing a series of ten documentary radio programs under a program-research grant from the Hill Family Foundation of St. Paul, Minnesota. These programs will be distributed throughout the United States via the National Educational Radio Network.

The discussions deal with various aspects of the impact of modern science and technology. Prominent scientists, educators and governmental officials will be drawn together for dialogue concerning the role of the scientist in society and the side effects of contemporary science.

To make these programs meaningful and to insure their effectiveness, we are dependent on those who have contributed significantly to the various areas of science and technology.

One of the programs in the series deals with "genetic engineering" and its implications for the future.

I would be most pleased if you could join me for this series. Our procedure is quite simple. We can arrange for a convenient time to meet in Palo Alto to tape record a brief interview. A copy of the questions to be asked you will be sent in advance for approval.

Thank you for your consideration.

Sincerely,

Steven K. Meuche
Producer-Director
